CELEBRATING A YEAR OF TRANSFORMATIVE INNOVATION

As we take a moment to reflect on the remarkable achievements of 2025, the groundbreaking innovation and commitment to excellence in healthcare that are synonymous with Jupiter Medical Center are clearer than ever. Over the course of this year, we made significant advancements in our mission to provide world-class care, earning national accolades and solidifying our status as the premier medical center in the region.

The grand opening of our new Patient Care Tower and Parking Garage serves as a hallmark of this year's exciting progress. These strategic initiatives are poised to dramatically enhance our capacity for inpatient services and innovative care delivery. The tower is dedicated to delivering specialized care in oncology, cardiology, and orthopedics, enabling us to accommodate the growing and complex healthcare needs of our community with unparalleled expertise.

Our strategic expansion efforts and ongoing investments in transformative technology underscore our commitment to delivering the highest standard of care. Earlier this year, our specialists achieved a historic milestone by being among the first in the nation to employ the Galvanize Therapeutics Aliya™ Pulsed Electric Field Ablation System to treat lung tumors. This state-of-the-art procedure showcases our experts' advanced knowledge and innovative practices, positioning Jupiter Medical Center as a leader in oncology nationally, while providing renewed hope and better outcomes for cancer patients.

Heart patients are also benefiting from our clinicians' innovative spirit, as our cardiac specialists pioneer the use of technology to enhance diagnostic accuracy and treatment effectiveness. Cleerly®, an advanced screening tool, enables our team to uncover critical risk factors by integrating patient scans with AI-driven software that analyzes

extensive data to identify and characterize vascular blockages. This resource equips our specialists with deep insights, allowing them to devise tailored treatment plans. For patients with atrial fibrillation (AFib), we were proud to be among the first in Florida to implement the VARIPULSE pulsed-field ablation platform, a potentially safer, minimally invasive treatment option. These treatments are all designed to be less invasive, increase precision, reduce recovery time, and enhance the patient experience.

The expertise of our medical professionals transforms innovative healthcare theory into practice. Our mission to deliver world-class healthcare hinges on recruiting exceptional clinicians—and creating an environment where they feel empowered to continuously enhance their skills. In turn, they enrich our teams across all levels. That foundation of excellence has led to our recognition on Forbes' lists of America's Best Midsize Employers and America's Best Employers for Women. As the only healthcare organization in South Florida featured on the Best Employers for Women list, Jupiter Medical Center continues to set the benchmark for workplace culture and leadership in the region.

The distinguished accolades we continue to receive are a testament to our medical staff's commitment to quality and patient-centered care. Being recognized once again in 2025 by Newsweek as one of the World's Best Hospitals and as a Grade "A" Hospital for Patient Safety by The Leapfrog Group attests to the commitment of our entire team. At Jupiter Medical Center, we have fostered a culture of excellence, ensuring that every member of our team plays a vital role in our mission.

As we conclude 2025, we express our heartfelt gratitude for the philanthropic support that has been instrumental to our mission. The generosity of our donors and the trust of the communities we serve make our successes possible. As the only independent not-for-profit health system in the region, we are dedicated to serving the healthcare needs of our community. Moving forward, we remain steadfast in our vision of a healthier future for our families and region, driven by the spirit of innovation and a relentless pursuit of excellence.

AWARDS AND ACCREDITATIONS

- Age Friendly Healthy System
- American College of Radiology: Designated Lung Cancer Screening Center
- American College of Radiology: Imaging services certification in all imaging modalities (MRI, PET, CT, Nuclear Medicine, Ultrasound, Mammography and Breast MRI) as well as a Breast Imaging Center of Excellence and a Diagnostic Imaging Center of Excellence
- American College of Radiology: Radiation Oncology
- American Diabetes Association: Diabetes Education
- American Heart Association:
 - Get with the Guidelines® Stroke GOLD PLUS
 - Target: Stroke Honor Roll Elite Plus
 - Target: Type 2 Diabetes Honor Roll Stroke
 - Target: Stroke Honor Roll Advanced Therapy
- Blue Distinction Center+ for Knee, Hip Replacements, and Spine Surgery
- The College of American Pathologists: Laboratory Services/Respiratory Services
- Commission on Cancer: Among only 30 percent of cancer programs in the nation accredited by this prestigious organization
- Joint Commission Accreditation: Hospital
- Joint Commission Accreditation: Antibiotic Stewardship Commendation
- Joint Commission Accreditation: Chest Pain Center
- Joint Commission Accreditation: Thrombectomy-Capable Stroke Center
- Joint Commission Accreditation: Total Joint Replacement for Hips, Knees, and Shoulders and Spine Surgery
- National Accreditation Program for Breast Centers (NAPBC): The first hospital in Palm Beach and Martin counties to achieve this accreditation
- National Pancreas Foundation Center of Excellence for Pancreas Cancer
- National Safe Sleep Certification
- Urgent Care Association: Urgent Care and Occupational Medicine
- US News High Performing: Lung Cancer Surgery, Knee Replacement, Hip Replacement, Hip Fracture, Pneumonia

Our commitment to innovating every aspect of patient care for the sake of exceptional outcomes is what draws Jupiter Medical Center together as an organization. This commitment guides the work we do every day, which is why the many awards and accreditations our programs continue to receive, though powerful proof of our effort, do not come as a surprise. With some of the country’s best clinicians who have made Jupiter Medical Center their professional home and a stable of technological advancements that continues to grow, we hope to continue receiving recognition from ratings organizations and national publications so more patients in our region understand where they can receive top caliber care that’s close to where they live and work.

U.S. NEWS & WORLD REPORT Jupiter Medical Center has been designated a “High Performing Hospital” by *U.S. News & World Report* in five categories for 2025, including Lung Cancer Surgery, Hip Fracture, Hip Replacement, Knee Replacement, and Pneumonia Treatment. This highly competitive designation is awarded to hospitals that excel across a variety of metrics. Hospitals that earn a high performing rating typically have better patient outcomes compared to others, bolstering patient trust.

NEWSWEEK *Newsweek’s* list of World’s Best Hospitals 2025 includes Jupiter Medical Center yet again, ranking us alongside top international institutions in 30 countries based on hospital quality metrics, patient survey results, and medical expert recommendations. This is the fourth consecutive year Jupiter Medical Center has been named to the list, showcasing our investments in cutting-edge technologies and unwavering dedication to quality. The designation also acknowledged Jupiter Medical Center as a global leader in Infection Prevention and Patient Satisfaction.

LEAPFROG “A” RATED HOSPITAL Another “A” Hospital Safety Grade from *The Leapfrog Group* marks the 14th consecutive accolade for Jupiter Medical Center since the fall of 2018, underscoring how our priorities — quality, safety, and patient experience — remain unchanging. Once again, we stand alone as the sole hospital in the Palm Beach and Martin counties to attain this top rating. As long as patients and their families continue to trust their lives to our care, we’ll never stop striving to meet the highest standards of safety.

HEALTHGRADES Representing the Top 10% of Hospitals in the nation, Jupiter Medical Center was recognized by Healthgrades as one of America’s 100 Best Hospitals for Joint Replacement. Notably, Jupiter Medical Center is the only hospital in Southeast Florida to receive this distinction. Additional Healthgrades accolades include the 2025 Joint Replacement Excellence Award, Five-Star Recipient for Total Knee Replacement and Five-Star Recipient for Total Hip Replacement.

BECKER’S 100 Jupiter Medical Center is proud to be recognized on Becker’s Hospital Review’s prestigious list of “100 Hospitals and Health Systems with Great Orthopedic Programs” for 2025. The national recognition is a result of JMC’s commitment to advancing orthopedic care in the region. We are honored to appear in the rankings alongside some of the country’s most established orthopedic institutions.

FORBES Striving to be a workplace that attracts the country’s best clinicians, management personnel, and staff has helped lay the groundwork for the awards Jupiter Medical Center receives for quality and safety each year. In 2025, *Forbes* recognized Jupiter Medical Center as one of the nation’s Best Midsize Employers, as well as one of the Best Employers for Women. We continue to set the standard for an inclusive workplace culture that fosters excellence at all levels.

THE BEST OF PALM BEACH COUNTY Although national rankings and prestigious international accolades are an important testament to our clinical excellence, there’s no substitute for the recognition of the people who rely on us—which is why we were so pleased to again be voted as a top choice for healthcare in Palm Beach County by *Palm Beach Post* readers across a range of categories, including best cardiology clinic/ hospital, best family practice, best hospital emergency room, best pediatric clinic, and best women’s health services. The recognition we receive from our community is yet another source of motivation for us to continue delivering innovative, world-class care.

CAMPUS EXPANSION

TRULY GROUNDBREAKING CARE

Since our inception, Jupiter Medical Center has continuously evolved to serve the needs of our community, prioritizing the delivery of exceptional, high-quality care. We are unwavering in our dedication to integrating innovative practices that enhance both quality and patient safety. Our campus expansion is a testament to these foundational principles, enabling us to elevate care delivery and address the increased demand for complex care.

Additionally, the expansion features a dedicated pharmacy, a rehabilitation gym, and advanced simulation labs that will be integral to our training programs. The labs will equip nurses with critical skills for high-stakes medical situations and provide training in labor, delivery, and neonatal intensive care. The incorporation of innovative simulation technologies will empower our clinicians, fostering a culture of excellence and ensuring they remain at the forefront of the evolving healthcare landscape.

Fostering a Culture of Innovation

Solidifying our leadership in the region by attracting the nation's leading physicians

EXPANDING ACCESS TO CARE

Growing and adding top clinicians to address the evolving needs of our community is more than a priority—it's an imperative. With more than 750 affiliated physicians representing over 80 specialties, Jupiter Medical Center is dedicated to making high-quality primary and specialty care accessible to all.

An exceptional continuum of care begins with outstanding primary care physicians who help ensure patients receive timely wellness screenings and preventative care. Each primary care physician that joins our team enhances our ability to serve patients who may seek access to our ever-growing network of specialists. Our concierge model elevates primary care a step further, giving patients access to highly customized care that fits their schedule. The footprint of our personalized Concierge Care has expanded to Stuart with the addition of expert physicians who specialize in delivering tailored experiences to meet each patient's unique needs.

At Jupiter Medical Center, we are developing our specialties with multidisciplinary teams in urology, pulmonology and oncology. The Barb and Joe Charles Center for Urology continues to grow as we evolve to meet increased demand for urology care in our region, while the Thoracic Surgery and Lung Center of Excellence has expanded to add pulmonologists specializing in a range of interventional pulmonology and advanced bronchoscopy procedures. The addition of an experienced medical oncologist hematologist specializing in breast and gynecologic cancers is crucial for addressing the growing demand for women's oncologic care in our community. Our investments in state-of-the-art technology equip clinicians across all specialties with the tools necessary to diagnose and treat even the most complex cases.

We believe that a collaborative approach to healthcare is essential for achieving the best outcomes for our patients. At Jupiter Medical Center, our growing team of clinicians is committed to delivering care that is customized to their individual needs. As we evolve, we remain rooted in our core values of compassion, excellence, and innovation. These principles guide us as we serve our community with unmatched quality and expertise.

"We continue to bring together top talent as we fulfill our mission of delivering world-class care to our community."

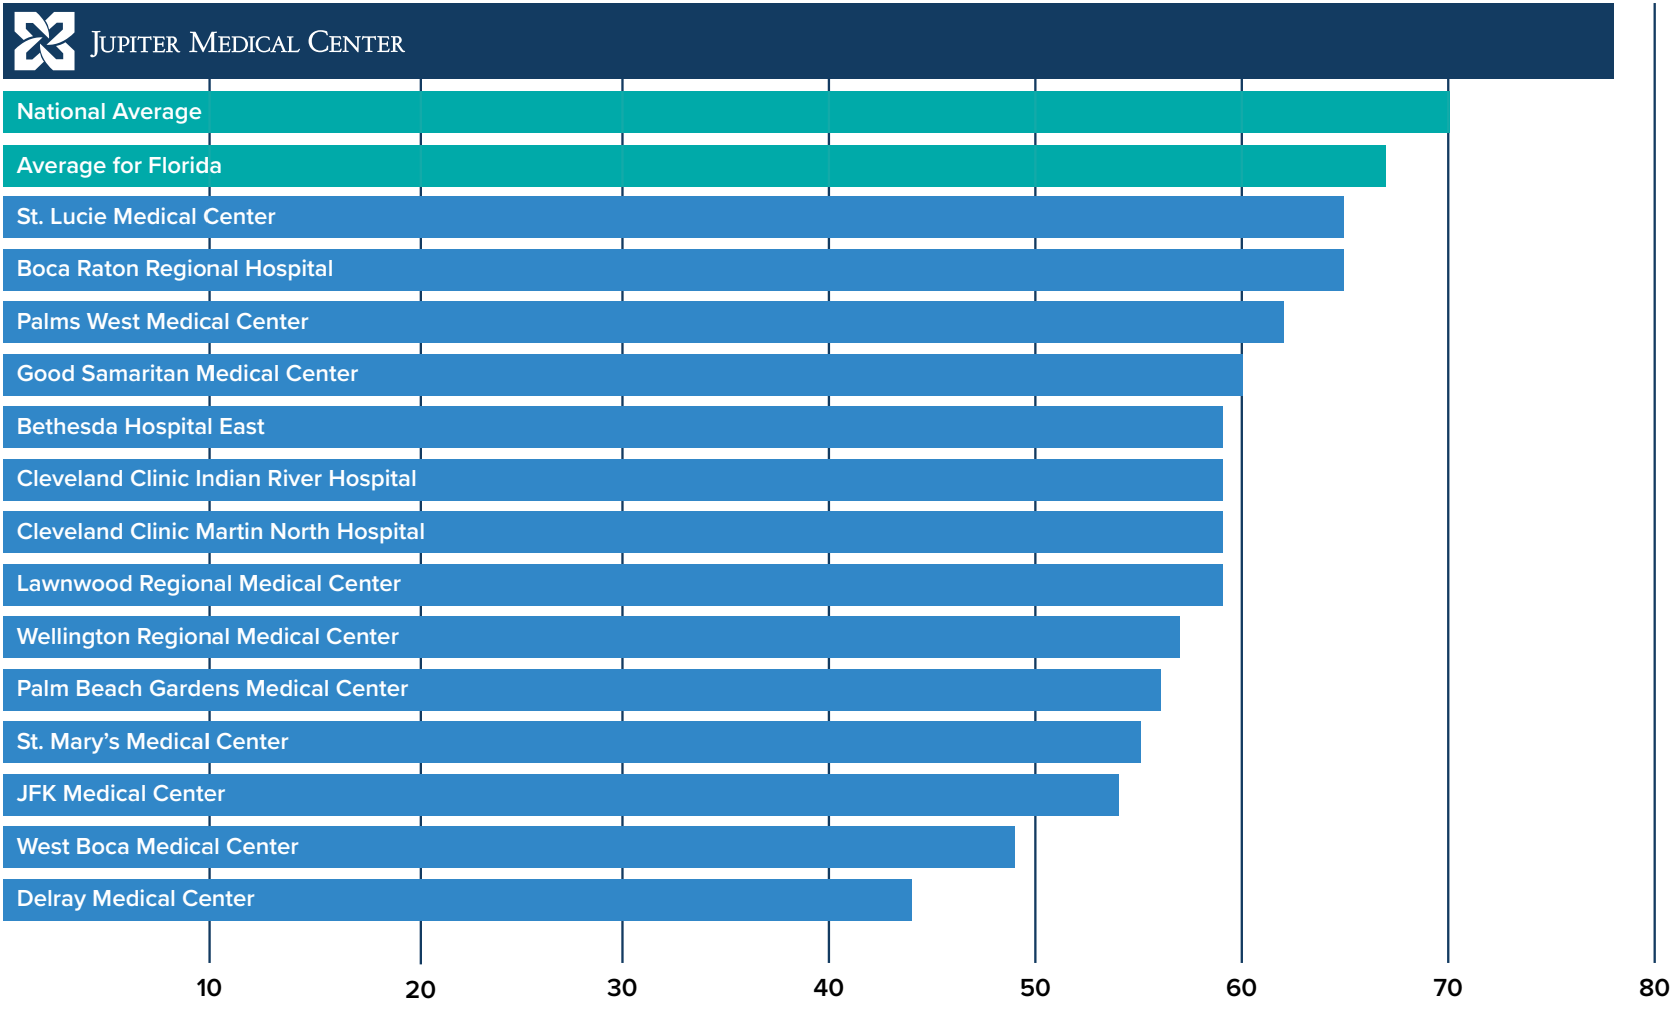

— Amit Rastogi, MD, MHCM
President & CEO

Investment in World-Class Care

Jupiter Medical Center’s continued leadership in patient experience – and by such a significant margin – serves as ongoing testament to our commitment to innovating patient care. Our investments in cutting-edge technologies and new facilities attract medical experts dedicated to providing a world-class experience for every patient, as evidenced

by ratings that surpass national benchmarks. Data is obtained from the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS), which surveys patients nationwide about their experience and likelihood of recommending a provider for care. For a comprehensive overview of the data, visit www.Medicare.gov/care-compare

Forging the Future of Cancer Care Here and Now

The Anderson Family Cancer Institute at Jupiter Medical Center has seen an extraordinary year of groundbreaking procedures and therapies. Our multispecialty team of experts includes surgical, medical, and radiation oncologists who offer life-saving treatments for our cancer patients.

LIFE-SAVING SURGERY FOR PANCREATIC CANCER

Jupiter Medical Center continues to lead the way in advanced surgical robotics. Dr. Shanel Bhagwandin, Medical Director of the Gastrointestinal Surgical Oncology Program and Program Director of the National Pancreas Foundation Center of Excellence, performed the first robotic Whipple surgery for pancreatic cancer in the region in August.

The use of surgical robots to assist with complex procedures, such as the Whipple, has been associated with improved patient outcomes and accelerated patient healing, so that patients can more quickly get back to the life they love.

Dr. Bhagwandin is a highly sought-after leader in gastrointestinal surgeries, boasting the highest volume for liver, pancreas, gastric, and esophageal procedures in the region, both open and robotic.

INNOVATIVE TREATMENT FOR LUNG TUMORS

We are excited to be one of the first hospitals in the United States to use a promising new, minimally invasive treatment, pulsed field ablation, for lung tumors. Dr. Kevin Green, Pulmonologist, specializing in advanced interventional bronchoscopic procedures, and Dr. K. Adam Lee, Cardiothoracic Surgeon and Medical Director of the Thoracic Surgery & Lung Center of Excellence, performed the procedure using the Galvanize Therapeutics Aliya™ PEF System.

PEF ablation is a minimally invasive procedure performed during a bronchoscopy. During the procedure, a needle is passed into the tumor, which delivers short pulses of electrical current, destroying the tumor without damaging healthy tissue. This technology enables us to be very precise in the area we target and also mobilizes the body's immune system to fight the tumor. Patients may experience little or no pain and a quicker recovery compared to traditional surgical approaches

This groundbreaking procedure combines the advanced expertise of our specialists with the latest therapeutic innovations. With the introduction of PEF ablation for lung tumors, Jupiter Medical Center continues to lead in medical advancements, offering renewed hope and enhanced outcomes for our patients.

TARGETED THERAPY FOR BLADDER CANCER

At Jupiter Medical Center we are witnessing the future of cancer care. We are proud to be among the first in the region to administer a first-in-class gene therapy for bladder cancer. ADSTILADRIN® (nadofaragene firadenovec-vncg) is the first and only FDA-approved gene therapy for non-muscle-invasive bladder cancer.

The new therapy targets cancer cells more precisely by delivering adenoviral vector-based gene therapy directly into the bladder, prompting the production of an immune-stimulating protein, harnessing the body's natural immune response and offering patients the best possible outcomes.

NATIONALLY RECOGNIZED CARE

Thanks to our committed team and their dedication to quality, Jupiter Medical Center continues to earn national recognition for breast care. The National Accreditation Program for Breast Centers (NAPBC), a quality program administered by the American College of Surgeons (ACS), has once again accredited our Comprehensive Breast Care Program. Jupiter Medical Center was the first breast center in Palm Beach County and the Treasure Coast region to be accredited by NAPBC in 2010. Our continued accreditation is emblematic of our commitment to providing best-in-class breast care in our region.

A Year of Innovation in Heart and Vascular Care

Jupiter Medical Center proudly reflects on a transformative year at the Robson Heart and Vascular Institute, highlighting significant advancements in cardiac care through the introduction of innovative technologies and procedures that uphold our standard of excellence.

EXPANSION OF ROBOTIC CARDIAC SURGERY

Under the leadership of Dr. Vivek Patel, cardiovascular surgeon, the cardiac robotic surgery program has expanded, marking a significant leap forward in state-of-the-art cardiac care. This program utilizes advanced robotic technology to provide greater precision and minimally invasive surgical options, fully aligned with our mission to enhance patient outcomes and reduce recovery times. Our highly skilled surgical team is dedicated to adopting these cutting-edge techniques, ensuring we remain at the forefront of cardiac surgery.

AI TOOLS FOR CUSTOMIZED CARDIAC TREATMENT PLANS

The integration of artificial intelligence (AI) into cardiovascular imaging continues to revolutionize our approach to patient care. We have incorporated AI-assisted analysis in coronary computed tomography angiography (CCTA) to precisely identify and quantify plaque accumulation while distinguishing hard from soft plaques, which is crucial for prevention. Our cardiac specialists leverage this technology to develop personalized treatment strategies, empowering patients to manage their health proactively through lifestyle modifications and medication plans. Customized plans address each patient's unique health needs and significantly reduce the risk of heart attacks, strokes, and sudden cardiac events.

INTRODUCING PIONEERING TREATMENTS

We are thrilled to introduce the Concomitant Procedure, a groundbreaking minimally invasive intervention for select patients with atrial fibrillation (AFib), which is characterized by an irregular heart rhythm. This innovative approach delivers successful treatment in a single outpatient visit rather than two separate procedures, months apart. Spearheaded by Dr. David Weisman, our director of cardiac electrophysiology, this initiative combines atrial fibrillation ablation with WATCHMAN device implantation to prevent strokes.

Traditionally, AFib patients faced the challenge of two invasive procedures: one to restore normal heart rhythm and the other for WATCHMAN implantation. This two-step process not only extended the treatment timeline but also increased risks and prolonged recovery periods. The Concomitant Procedure streamlines treatment, improving operational efficiency, reducing patient strain, allowing for a quicker return to daily activities, and enhancing overall quality of life.

We are also integrating the VARIPULSE Pulsed Field Ablation system to refine our AFib treatments. This advanced technology improves the precision of ablation procedures for AFib and other rhythm disorders by delivering controlled energy pulses that specifically target and ablate abnormal heart tissue with minimal damage to surrounding healthy tissue, reducing recovery times and the risk of complications. The system's real-time imaging capabilities allow our physicians to visualize the heart's anatomy during procedures, ensuring effectiveness and providing an added layer of safety.

Our structural heart program continues to lead the way with the introduction of the TriClip procedure. This minimally invasive transcatheter heart valve repair is used to treat tricuspid regurgitation, a condition caused by a leaky tricuspid valve, in select patients. The procedure involves inserting a clip via a catheter through a vein and guiding it to the heart to bring the valve's leaflets together, thereby reducing blood leakage. Under the guidance of Dr. Michael Sabbah, this less-invasive alternative to open-heart surgery enables patients to return home faster.

LOOKING AHEAD: COMMITMENT TO EXCELLENCE

As we celebrate our achievements from the past year, our Heart and Vascular team remains steadfast in advancing cardiac care. By leveraging AI imaging analysis, integrating pioneering technologies such as the VARIPULSE system, and mastering transformative procedures like the Concomitant Procedure, we are reshaping the landscape of heart and vascular care. Together, we look forward to another year of groundbreaking advancements.

A Commitment to Excellence in Orthopedic and Spine Care

Jupiter Medical Center stands unparalleled in the region for its dedication to advancing orthopedic and spine care.

ADVANCED TECHNOLOGIES—DRIVEN BY PASSION

At the Anderson Family Orthopedic and Spine Center of Excellence, technology, innovation, and the expertise of our top clinicians converge to provide exceptional care. Our cutting-edge robotic solutions, including the CORI™ robotic-assisted surgical system, Mako SmartRobotics™, and VELYS™ robotic-assisted solutions, cater to a variety of orthopedic surgical applications—from knees, to hips, to shoulders, and beyond. These advancements offer patients an unprecedented range of options to regain mobility and enhance their quality of life without the prolonged recovery periods typically associated with conventional methods.

Our expert clinicians are committed to mastering these innovative robotic solutions, as ongoing clinical practice reveals their effectiveness in reducing pain and accelerating recovery. Our team’s approach combining preoperative rehabilitation with the CORI system has enabled many patients to be discharged on the same day or the next day after knee replacement surgery.

Earlier this year, we proudly introduced the region’s first robotic shoulder replacement, expanding our advanced orthopedic robotic arm-assisted offerings beyond hip and knee procedures. This positions Jupiter Medical Center as a regional leader in orthopedic care. Utilizing Mako SmartRobotics™, this surgery integrates CT-based 3D planning with intra-operative guidance to accurately map a patient’s unique bone structure and alignment, facilitating the creation of anatomically comparable or enhanced replacement joints. The Mako system allows for precise adjustments and placements of prosthetics in real time during surgery.

COMPREHENSIVE PATIENT CARE

Achieving the best outcomes for patients requires a holistic approach, which is why we have invested in multiple robotic systems, each with distinct advantages. Our focus on a team-based approach to orthopedics ensures that every patient receives a procedure tailored to their unique physiology and lifestyle. After the procedure, rehabilitation is a vital component of successful recovery. Jupiter Medical Center’s rehabilitation services encompass a comprehensive program staffed by licensed, experienced clinical professionals, including physical, occupational, and speech therapists, many

with specialized certifications. Our team also includes exercise specialists and massage therapists proficient in alleviating pain and restoring function.

RECOGNITION FOR OUTSTANDING CLINICAL OUTCOMES

Jupiter Medical Center’s orthopedic program has garnered exceptional recognition from national publications and accrediting bodies, highlighting our excellence both regionally and beyond. We are the only hospital in Southeast Florida recognized by Healthgrades as one of America’s 100 Best Hospitals for Joint Replacement, joining a select group in the state. Additionally, *U.S. News & World Report* has recognized us as a “High Performing Hospital” for hip fracture, hip replacement, and knee replacement, further underscoring our program’s strengths and joining our Joint Commission accreditation for total joint replacement for hips, knees, and shoulders, as well as for spine surgery. Our designation as a Blue Distinction Center+ for knee and hip replacements and spine surgery, coupled with our recognition as a Great Orthopedic Program by Becker’s Health, reflects the unwavering commitment of our entire orthopedic team to excellence in patient care.

Advancing Stroke Care Through Cutting-edge Technology and Exceptional Clinical Expertise

Offering top-tier stroke care, combining compassion with innovation

INNOVATIVE CARE FOR THE MOST COMPLEX CASES

At Jupiter Medical Center, stroke treatment begins the moment symptoms are recognized. Our multidisciplinary team delivers timely, evidence-based care for cases ranging from mild to complex. Working closely with first responders and using advanced imaging and treatment technology, we focus on improving recovery and minimizing long-term effects—because every minute matters.

Our team's comprehensive approach to stroke care enables us to manage high-severity, complex cases:

- Advanced imaging including 3T MRI and CT capabilities
- Neurointerventional radiology expertise
- Rapid Response Team for early intervention and timely care
- Neurological Intensive Care for critical care

While expedited intervention is vital, we recognize that recovery can be a gradual process. Our commitment to excellence in stroke care extends beyond immediate treatment, leveraging a multi-disciplinary team of compassionate experts. Our physical, occupational, and speech language therapists, along with aquatic and exercise specialists, employ innovative therapies and treatment modalities to enhance quality of life for stroke survivors.

CUTTING EDGE TECHNOLOGIES BOLSTER AN EXCEPTIONAL PROGRAM

Jupiter Medical Center proudly became the first in South Florida to implement the Neuroguard IEP® system for carotid artery disease (CAD), a condition that narrows the carotid arteries on either side of the neck that carry blood to the brain and accounts for a third of all stroke cases. This first-in-class, FDA-approved medical device reduces the chance of stroke during and after the procedure to treat carotid artery disease.

Our ongoing accolades, including the seventh consecutive American Heart Association's Get With the Guidelines® Stroke Gold Plus award, reflect our commitment to ensuring stroke patients receive the highest standard of care based on nationally recognized, research-based guidelines. Our certification by the Joint Commission as the region's first Thrombectomy-Capable Stroke Center underscores our leadership position and drives our relentless pursuit of innovation for the benefit of our patients.

"I've never seen anything as impressive as the care I received," says Linda. "Everyone was so amazing, so genuine, so caring. Jupiter Medical Center was life-changing and life-saving for me. If I had gone anywhere else, they wouldn't have had the high-definition technology to see the clot in my brain. I might have died that day."

— Linda
Stroke Survivor

A Legacy of Excellence in Maternity and Pediatric Care

At Jupiter Medical Center, our team is devoted to helping families thrive from the moment of birth and throughout their lives.

RECORD BIRTHS—UNWAVERING TRUST

The excellence of our obstetric and pediatric services highlights our unwavering commitment to delivering innovative care for families. In 2025, as we commemorate more than 25 years of obstetrical care, we welcomed a record number of women and families who placed their trust in us. Our warm and inviting environment, combined with advanced technology and highly skilled clinicians, offers patients comfort and reassurance during this joyous time.

While prioritizing safety is key, we recognize that comfort enhances the birth experience for families in our community. Delivering at Jupiter Medical Center means enjoying a personalized birthing experience in our modern, spacious suites, alongside the assurance of 24/7 laborists who collaborate seamlessly with personal physicians for optimal care.

For those desiring a more personalized level of service, we proudly introduce the Tansky Experience—a concierge-level option designed to elevate every aspect of maternity care. Our postpartum suites offer luxurious overnight accommodations for loved ones, while new moms enjoy spa-like amenities. Featuring a chef-curated menu and luxurious amenities, every detail has been meticulously crafted to ensure attentive, round-the-clock care from a dedicated team.

AWARD-WINNING MATERNITY CARE AND SAFE SLEEP EDUCATION

The community's recognition of our commitment to maternity and childbirth has resonated among Treasure Coast residents who voted us as the Best Maternity and Childbirth Center on the Treasure Coast. We proudly hold certification from the National Safe Sleep Hospital Certification Program, reflecting our dedication to implementing safe sleep practices within the hospital and promoting safer sleep habits at home. Our Safe Sleep initiative provides ongoing support and education for parents of infants up to one year, reaffirming our commitment to patient safety.

CONTINUUM OF CARE

Babies born as early as 30 weeks gestation are cared for in our Level II De George Neonatal Intensive Care Unit (NICU). Our specialized team provides round-the-clock care for these precious newborns, utilizing leading-edge monitoring equipment and supportive technologies to ensure they thrive and return home with their families.

For immediate pediatric care needs, the Mastroianni Pediatric Emergency Department features top pediatric emergency specialists who are equipped with the latest technologies. Our network of convenient urgent care centers further enhances our complete continuum of pediatric care.

“Thanks to their teamwork and gentle approach, everything went perfectly, and I will always be thankful for the excellent care I received. It was truly an unforgettable experience in the best possible way.”

— New Mom

Jupiter Medical Center Understands That a Healthy Community Thrives Together.

Our commitment to a healthier community extends far beyond the walls of Jupiter Medical Center. We bring our team and clinical expertise directly into the community – where people live and work – through health education, preventive screenings, and partnerships that promote wellness. From sponsoring local initiatives to collaborating with employers at health fairs, we are dedicated to creating healthier tomorrows wherever we go—because caring for our community is at the heart of everything we do.

Philanthropy Empowers Jupiter Medical Center's Not-for-Profit Mission and Enables Us to Continue Making Groundbreaking Advancements in Patient-Centered Care.

At Jupiter Medical Center, philanthropy is more than support—it is a catalyst for transformation. As an independent, not-for-profit hospital, we rely on the generosity of our donors to bring bold ideas to life, elevate the standard of care, and expand access to the specialty services our growing region deserves. Their investment empowers us to innovate with purpose and deliver exceptional healthcare to every patient.

Each gift strengthens the foundation upon which Jupiter Medical Center continues to build. Donor partnership enables us to build leading-edge facilities, accelerate the adoption of advanced technologies, and develop centers of excellence that redefine what is possible in community healthcare. Together, we are creating a future where the highest level of care is close to home.

ADVANCING ORTHOPEDIC EXCELLENCE FOR OUR COMMUNITY

Orthopedic care is one of the most in-demand specialties in our region, with a rapidly growing need driven by an active population, rising joint replacement volumes, and the increased complexity of musculoskeletal conditions. The opening of our new Patient Care Tower in January 2026 marks a defining moment in Jupiter Medical Center's ability to meet that demand.

Thanks to generous philanthropic support from many donors including Russell and Lauren Fuchs and The Frisbee Family, Jupiter Medical Center will have two new dedicated orthopedic floors designed to deliver an unparalleled standard of care for patients recovering from orthopedic surgery and complex musculoskeletal injuries.

The new orthopedic units – located on the third and fourth floors of the Patient Care Tower – will include 44 private beds, two nurses' stations on each floor, and specialized physical therapy and rehabilitation gyms on both levels. This design ensures patients receive seamless, integrated care from surgery through recovery, all within a space purpose-built for mobility, safety, and comfort.

By expanding our orthopedic footprint, Jupiter Medical Center will be able to care for significantly more patients each year and advance our reputation as a destination for orthopedic excellence. These dedicated floors will enhance collaboration among surgeons, nurses, rehabilitation therapists, and care teams; support faster recovery times; and create an environment where patients can regain strength and independence with confidence.

Philanthropic support has a lasting impact on our community. Every donor's investment in Jupiter Medical Center's mission helps ensure that every patient – from young athletes to active older adults – has access to world-class orthopedic care close to home.

HONORING A LEGACY THROUGH COMPASSIONATE CARE

A generous gift from Rita Tansky is helping Jupiter Medical Center launch palliative care services for its oncology program, honoring the memory of her late husband, Burt Tansky, a beloved donor and longtime member of our Board of Trustees who passed away last year. Burt's dedication to Jupiter Medical Center and his commitment to the wellbeing of our community continue to inspire us, and Rita's philanthropy ensures that his legacy of compassion will live on through the care we provide to patients and families.

Palliative care offers specialized support for those facing serious illness, addressing not only physical symptoms like pain or nausea, but also the emotional, social, and spiritual challenges that accompany complex medical conditions. This essential care is delivered by a multidisciplinary team, including physicians, advanced practice nurses, social workers, and therapists who work alongside a patient's primary medical team to ensure their treatment aligns with their personal goals and values.

With Rita's generous support, Jupiter Medical Center is advancing its vision to build a comprehensive palliative care program that serves individuals at every stage of illness. The expanded team will provide guidance, symptom management, and comfort to patients and their loved ones, while working in partnership with Trustbridge Hospice Care to deliver seamless, collaborative support.

Rita's generosity creates a meaningful and enduring tribute to Burt by helping more families find relief, clarity, and compassionate care during some of life's most challenging moments.

EXPANDING ACCESS TO ADVANCED IMAGING CARE

A transformative \$5 million gift from Dorothy J. Thomson is supporting the expansion of The Margaret W. Niedland Breast Center, strengthening its role as the region’s leading destination for breast health and advanced imaging services. Dorothy’s generosity is a deeply personal tribute, inspired by her own breast cancer journey and the compassionate care she received at the Center.

Since opening in 2015, the Niedland Breast Center has become the cornerstone of women’s imaging at Jupiter Medical Center, providing nearly 40,000 exams annually with leading technologies including 3D mammography, breast MRI, ultrasound, and image-guided biopsy. Rapid community growth has significantly increased demand, resulting in extended wait times for services that are essential to early detection and timely diagnosis.

To meet this need, Jupiter Medical Center will expand the Center by adding a dedicated 13,000-square-foot imaging wing that will serve patients across the region. The addition will include new CT scanners, expanded ultrasound capacity, a second MRI, additional mammography suites, an outpatient laboratory, and space to support integrative mindfulness programs that promote comfort and healing.

In recognition of Dorothy’s extraordinary commitment, the Center’s new lobby and healing garden will be named in her honor—spaces that reflect her belief in compassionate, patient-first care. Her generosity ensures that more individuals will receive timely, high-quality imaging and diagnostic services, strengthening our ability to provide exceptional care when it matters most.

ELEVATING CLINICAL EXCELLENCE THROUGH SIMULATION

Forward-thinking gifts from Alta and Peter Hamilton and The Booth Foundation are helping to establish Jupiter Medical Center’s state-of-the-art Center for Clinical Simulation in the new Patient Care Tower. This advanced training environment will strengthen the skills of nurses, physicians, and allied health professionals across multiple specialties, ensuring that every patient benefits from highly prepared, confident, and collaborative care teams.

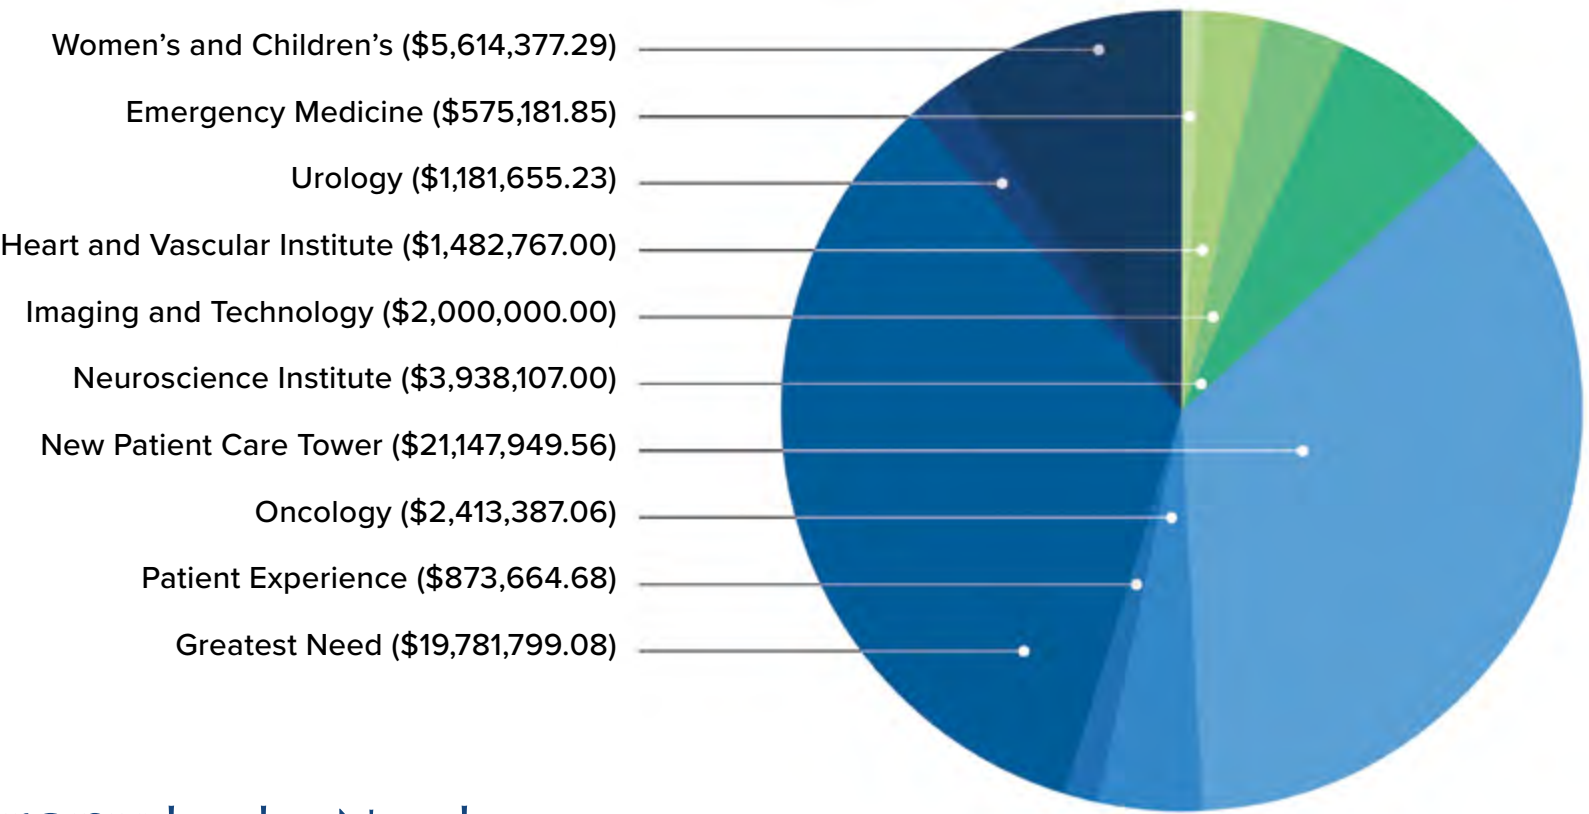

The Center will feature three lifelike simulation suites and a dedicated 30-person simulation classroom, offering immersive learning experiences in nursing, emergency medicine, surgery, anesthesia, pediatrics, obstetrics and gynecology, and more. Through hands-on training with high-fidelity mannequins, specialized task trainers, virtual reality, and standardized patients, clinicians will practice decision-

making, technical skills, communication, and teamwork in a safe, controlled environment that mirrors real clinical scenarios.

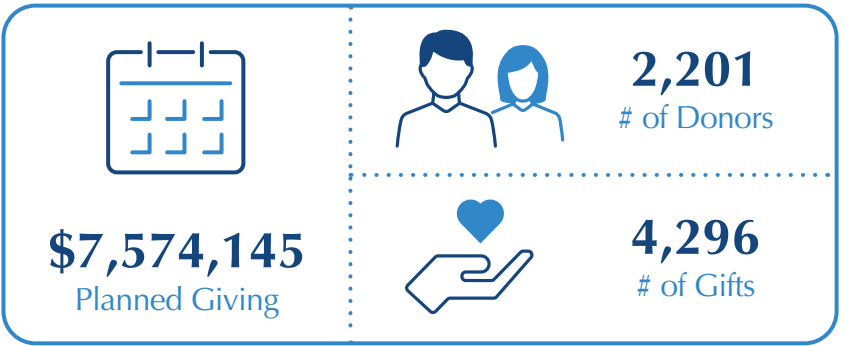

This cutting-edge facility will be fully equipped with hospital-grade beds, monitors, defibrillators, medication prep areas, and advanced recording technology that allows instructors to observe, assess, and debrief each session. Simulators respond with human-like accuracy, enabling clinicians to learn from complex situations – from cardiac events to stroke care to labor and delivery – without risk to actual patients.

As demand for clinical experience grows and healthcare becomes increasingly complex, simulation-based education is essential to developing skilled, compassionate clinicians who are prepared for every situation. The generosity of the Hamilton family and The Booth Foundation ensures that Jupiter Medical Center can deliver this elevated standard of training, strengthening the quality and safety of care throughout our institution.

Honor a Caregiver

Each year, the Jupiter Medical Center Foundation acknowledges the invaluable contributions of caregivers who have significantly enhanced the lives of patients and their families. From October 2024 through September 2025, a total of 163 individual caregivers and departments were identified by appreciative patients through their generous donations to the Foundation. The benevolence of these donors supports our mission to deliver exceptional care while advancing our capabilities in services, technology, and infrastructure.

At Jupiter Medical Center, our pursuit of excellence has always been guided by our spirit of innovation. Throughout every decade of our growth, we have evolved alongside advances in medicine and technology—driven by an enduring commitment to excellence that keeps us not only in step with change but ahead of it. This mindset positions Jupiter Medical Center as the leader in quality, safety, and patient experience.

Our recent campus expansions are a testament to that forward-thinking approach. The new Patient Care Tower exemplifies how thoughtful growth translates into tangible impact. While the addition of patient beds meets the needs of our expanding community, the Patient Care Tower's true value lies in the environment it creates for exceptional care—featuring specialized floors for oncology, orthopedics, and heart and vascular services, as well as advanced recovery programs designed to improve outcomes. Equally transformative are the state-of-the-art simulation labs that prepare the next generation of medical professionals, ensuring that innovation extends seamlessly from training to treatment. These enhancements allow us to envision our entire campus, expanding our emergency department, women and children's services, concierge and observation units.

Close to our main campus, we are excited about the expansion of imaging services as a vital step toward ensuring that everyone in our region has access to state-of-the-art diagnostics in a healing environment. Our Margaret W. Niedland Breast Center will soon expand by 13,000 square feet, adding a state-of-the-art CT scanner, a second MRI, additional mammography suites, and an ultrasound biopsy room.

In the coming months, we will break ground on the Neighborhood Hospital at Avenir—a vital extension of our mission to bring world-class care closer to the communities we serve. The new facility will provide immediate access to emergency services, surgery, imaging, laboratory, rehabilitation, and both primary and specialty care.

Technology helps us push boundaries, but top talent delivers results. Another hallmark of our approach is attracting clinicians dedicated to early adoption of breakthrough technologies. Across all disciplines, our care teams are consistently among the first in the region to employ leading-edge, minimally invasive techniques and care models that enhance safety, precision, and recovery.

With exceptional people, world-class technology, strategic growth, and an unwavering focus on elevating the patient experience, Jupiter Medical Center continues to set the standard for quality and patient safety in our region. The honors we've received are not endpoints but serve as encouragement to reach higher, redefine excellence, and push the boundaries of what's possible in healthcare.

The steadfast leadership of our Board of Trustees and leadership team continues to guide our vision. Together, we are committed to innovating without limits, enhancing every facet of care with the goal of doing more and doing it better.

On behalf of the entire leadership team, thank you for being part of this extraordinary journey—one defined by innovation, compassion, and a driving force to deliver healthier tomorrows for all.

Amit Rastogi, MD, MHCM
